

ENMUSICDIGIT

NFTs to Enhance Musicians' Digital Resilience

E-ZINE NO 2

**Co-funded by
the European Union**

"Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union and therefore the European Union cannot be held responsible for them."

*Welcome to the second e-zine of the
EnMusicDigit project!*

WHAT HAVE WE BEEN DOING SO FAR?

Designing the MOOC's content and platform has been six hard-working months. The STAVE ENCRYPT team collaborated with experts in blockchain technologies and NFTs to ensure that the course will provide the correct information to musicians in a simple and efficient format.

We have specified the modules the course will cover, the video scripts, and the tools for creating them.

The first video drafts have been sent to experts for feedback with the aim of finalising the videos' content in the following two months.

WHAT TOPICS WILL THE VIDEOS COVER?

The topics the videos cover are:

- Introduction to NFTs
- The first step in creating NFTs (blockchain platforms)
- Crypto wallets
- Creating a musical NFT
- Creation of an NFTs collection
- Selling NFTs

Pilot testing of the videos and MOOC

The following steps for the project are:

- Production of the interactive PDFs that will accompany the videos
- Develop knowledge test questionnaires for each module
- Create feedback questionnaires
- Translate all content in the Greek language, and
- Test the videos and the platform's functions.

UPCOMING EVENTS

The STAVE ENCRYPT team is already planning events to promote the ENMusicDigit project's final results.

Our effort is to design events both online and face-to-face to maximize the project's visibility.

Apart from organising our own events, we are also looking for opportunities to participate and collaborate in events implemented by other organisations.

"All music is based in one way or the other, or influenced through the ages, on technology."

Hans Zimmer, Music Producer
